

Services Overview

The life-changing results that individuals served by Bridgeway experience have been made possible because programs like PACT, RIST, Bridge to Wellness Primary Care along with Supportive Housing, Supported Education, Employment Services, and Integrated Case Management Services have been prescriptively funded largely by the NJ Division of Mental Health and Addiction Services (DMHAS) and SAMHSA, the federal Substance Abuse and Mental Health Services agency.

Over the years, Bridgeway's unique operational philosophy for programming has been to deliver comprehensive wellness services through a multi-disciplinary team approach, in which the personal goals and challenges of each individual became the guiding informant for care plans. This philosophy has been particularly successful as Bridgeway became the preferred Olmstead partner for psychiatric rehabilitation services for the NJ DMHAS. Since the adoption of the Olmstead Act in NJ, Bridgeway has been the leader in keeping people out of institutionalized care, and in their communities, where 24/7 rehabilitative care for mental illness is more successful and ultimately less expensive to deliver.

List of Bridgeway Programs:
